

Replacement Hot Tub Covers

HS58-001

Your hot tub is an expensive purchase and deserves protection from sunlight, water ingress and chemical treatments.

Here at Hydrosparcs we offer high quality hot tub covers made to measure to suit your particular make & model.

We've found that there is a confusing amount of information about hot tub covers available, so here's our checklist of the points you need to consider:

Available Colours

Why cover a Hot Tub?

Most outdoor hot tubs are situated with no shelter or protection from the elements. Being partly undercover (e.g. underneath a gazebo) will offer some protection but the UV from sunlight will eventually take its toll, fading the tub's surface.

There is also the risk of debris & leaves which can enter the hot tub and clog the system; plus of course an open hot tub poses a danger to children.

Heating a hot tub is expensive without a cover, as you will find that you have no protection against heat loss and this will cost you more money over time.

If your current cover is worn, warped, sagging or has become heavy, it's time to replace it!

Buyers Beware

A good hot tub cover needs to be sturdy, well made and able to withstand everything the UK weather can throw at it! Strong construction and good insulation are essential.

However many hot tub covers available are of inferior quality. Although initially they may be cheaper, you will find they quickly lose rigidity or let in water - and then you are faced with the extra cost of repairs.

All the hot tubs covers supplied by Hydros pares are made in the UK using marine grade vinyl, steel reinforcements and superior core insulation.

Product Features

With Hydros pares you have peace of mind as the hot tub covers we supply are specially made to resist the effects of weather, UV, water and chemicals, as follows:

- Vinyl, mesh, threads and zips are all Marine Grade (UV and mildew treated)
- Virgin foam (not reclaimed or recycled) for a superior quality thick density core
- Chemically resistant encapsulated wrap (not cheap plastic sheeting), twice sealed to protect the core
- Zinc-plated steel reinforcement to prevent sagging (not aluminium, which bends far too easily)
- Tapered cover (4" to 3") to allow water and snow to run off naturally
- Child locks and reinforced handles
- Made in the UK to your specifications
- 10 colours to choose from
- 12-month guarantee

Made to measure

We can deal with covers for almost any shape or size of hot tub.

It's crucial that your hot tub cover fits well and it's worth spending some time getting the dimensions just right, as we cannot be responsible for covers that don't fit due to the wrong measurements!

To make things simpler please refer to our **cover measuring guide** before completing the **order form**, below.

Your new cover will be ready in 3-4 weeks from the date of your order.

Available upgrades / services

- **Double wrapped core** – Instead of one layer of moisture protection the cover has two giving it the a double layer protection will enhance the life span greatly of water ingress, anyone who has ever had an old waterlogged cover will understand.
- **Continuous heat seal** – this is where the seal runs through the entire length of the covers fold, thus limiting the heat loss through the hinge, a popular choice in colder climates
- **Extra reinforcement of the lid** –extra strength is added to the lid which can hold a person's weight (not recommended) a very good idea for low level spas or where children are likely to climb
- **Collection and disposal** of your old cover upon delivery of your new one.

For any of the above please see our current price list

Care & Consideration

A cover is there to protect your hot tub and is not designed to be stood or walked on - improper use will shorten the life of any hot tub cover! A good cover will last on average between 3 & 5 years
